HANA BAUTA

New York, NY | bauta.hana@gmail.com | linkedin.com/in/hana-bauta | github.com/hb537

RESEARCH INTERESTS

Infectious disease epidemiology; healthcare-associated infections; outbreak investigation and surveillance; vector-borne disease; mental health and social determinants of health; computational phenotyping and digital health equity in low-resource settings.

EDUCATION

Cornell University — College of Veterinary Medicine *Ithaca, NY*

Master of Public Health, Concentration in Infectious Disease Epidemiology *Expected May 2027*

- Cumulative GPA: 4.16; Dean's List | August 2025 – Present
- Coursework: Advanced Epidemiologic Methods, Biostatistics for Health Sciences, Data Analysis with R, Social Epidemiology, Infectious Disease & Health, Pandemic Prevention & Preparedness

Rutgers University – New Brunswick *New Brunswick, NJ*

Bachelor of Science in Public Health, Magna Cum Laude, Highest Honors *May 2024*

- GPA: 3.74; Dean's List (multiple semesters) | September 2020 – May 2024
- Certificates: Global Health and Health Policy; Public Health Preparedness

Bergen Community College *Paramus, NJ*

Post-Baccalaureate Pre-Health Coursework (part-time) *2020, 2025*

- Chemistry; Biology, Physics I & II with Lab; Biochemistry with Lab

RESEARCH EXPERIENCE

Graduate Research Intern, Department of Population Health *May 2026 – Present*

NYU Langone Health / NYU Grossman School of Medicine, New York, NY | PI: Keng-Yen Huang, PhD; Supervisor: Hyungrok Do, PhD *~20 hrs/week*

- Contribute to a NIMH-funded study of preventive strategies for child health disparities, including data collection, statistical analysis, and dissemination of findings
- Designed and executed independent secondary data analysis of the 2024 National Survey of Children's Health (complex survey design in R) to generate population-representative prevalence estimates
- Developed reproducible R Markdown pipeline producing weighted prevalence tables and publication-quality visualizations, delivered as a needs-assessment brief to inform intervention design
- Translated population-level findings into a prototype digital intervention toolkit, operationalizing Research Domain Criteria (RDoC) constructs as candidate intermediate outcomes

Research Assistant / Project Intern, New York University *2018 – 2019*

NYU Langone Health, New York, NY *~15 hrs/week*

- Contributed to a cross-cultural health communication study developing measurement tools for low-literacy populations in Uganda and Nepal
- Adapted standardized psychometric instruments (Strengths and Difficulties Questionnaire) into visual formats pairing written items with images to improve comprehension and validity in low-literacy contexts
- Collaborated with a multidisciplinary international team on instrument development and parent-facing intervention materials

MANUSCRIPTS & CONFERENCE PRESENTATIONS

- Bauta, H., et al. (in preparation). The Research Domain Criteria (RDoC) as a Roadmap for Precision AI in Mental Health: From Diagnosis to Neurobiologically Informed Treatment. Co-author.
- Do, H., Liu, J., Bauta, H., Bauta, B., & Huang, K.-Y. (2026, May). From engagement metrics to precision care: Computational phenotyping for AI-driven digital mental health [Poster]. The New Wave of AI in Healthcare 2026, New York Academy of Sciences / Icahn School of Medicine at Mount Sinai, New York, NY.
- Bauta, H., & Huang, K.-Y. (2026, May). A scalable strategy for advancing child mental health equity in low-resource school settings [Poster]. Cornell Center for Health Equity Symposium, Ithaca, NY. Single-arm feasibility

study (N=35 teachers, Uganda) in collaboration with Makerere University and Uganda Ministry of Education & Health.

- Bauta, H. (2023, April). Pharmaceutical pollution in the Hudson River: An educational intervention [Panel]. Rutgers Undergraduate Research Writing Conference, New Brunswick, NJ. Finalist; archived in Rutgers University Libraries.

ADDITIONAL RESEARCH PROJECTS

Internet Use and Anxiety Symptom Severity Among U.S. College Students *May 2026*

Graduate Research Report | Cornell University, VTPEH 6270: Data Analysis with R

- Conducted multivariable linear regression analyses (N=34,953; Healthy Minds Study 2024–2025) examining the association between daily internet use and GAD-7 anxiety symptom severity
- Identified significant first-generation student moderation effect (B=0.060, p=0.041); produced publication-ready figures and interactive Shiny visualization (github.com/hb537/HanaBauta_Finalproject)

TEACHING, MENTORING & PROGRAM DEVELOPMENT

Youth Summer Wellness Program Coordinator *June 2024 – August 2024*

NYU Langone Health, Department of Population Health, New York, NY *Full-time*

- Designed and delivered educational and wellness curricula for youth participants, including skill-based instruction in leadership, emotional intelligence, and health literacy
- Developed and led workshops on research methodology and AI-based research tools, mentoring high school and college students through independent projects on social media use and adolescent mental health

SERVICE, LEADERSHIP & VOLUNTEER EXPERIENCE

Team Member, CareSynch — NudgeLab Behavioral Design Challenge *April 2026*

- Co-designed precision health intervention applying AI-driven Just-In-Time Adaptive Interventions (JITAI) to Type 2 Diabetes and weight-related conditions in limited-access settings
- Awarded Nudge Impact Award (Top Team), O.P. Jindal Global University, Jindal Institute of Behavioral Sciences — Health, Wellbeing & Human Habits track

Community Volunteer, National Marrow Donor Program (NMDP) *2025-2026*

- Supported donor registry outreach and community health education initiatives

Vice President and Co-Founder, Words for Wellness, Inc. *September 2023 – August 2024*

501(c)(3) Nonprofit | Bergen New Bridge Medical Center, Paramus, NJ *~10 hrs/week*

- Co-founded nonprofit supporting mental health through therapeutic reading for psychiatric inpatients; established and managed library within adolescent inpatient psychiatric unit
- Led fundraising, community outreach, and book donation initiatives; organized mental health advocacy events addressing community stigma

TECHNICAL & METHODOLOGICAL SKILLS

Statistical Software: R (regression, complex survey analysis, ggplot2, R Markdown, Shiny), SPSS, REDCap

Quantitative Methods: Epidemiologic study design, multivariable regression, complex survey analysis, secondary data analysis, K-means clustering, computational phenotyping, social network analysis

Qualitative & Mixed Methods: Survey and instrument development, cross-cultural instrument adaptation, community health assessment, feasibility study design, program planning and evaluation

Research Communication: Scientific writing, reproducible research workflows, data visualization, plain-language health materials, health literacy assessment (CDC Clear Communication Index), workshops and training

Languages: Albanian (native/advanced), Spanish (professional/advanced), English (native)

PROFESSIONAL TRAINING & CERTIFICATIONS

Research Ethics: CITI Program — Human Subjects Research / IRB (March 2026 – March 2031)

Clinical Research: Community Health Worker Training in Clinical Research, NYU Langone CTSI (2026)

Emergency Preparedness: FEMA ICS-100; IS-700 (NIMS); IS-800 (National Response Framework); IS-302; IS-909

Other: Narcan Administration (Cornell, 2026); Spanish for Successful Communication in Healthcare Settings, Coursera (in progress)

HONORS & AWARDS

Cornell Global Game Changer Scholarship *2026*

Nudge Impact Award (Top Team), NudgeLab Behavioural Design Challenge *2026*
O.P. Jindal Global University, Jindal Institute of Behavioural Sciences — Health, Wellbeing & Human Habits track

Finalist Panelist, Rutgers Undergraduate Research Writing Conference (URWC) *2023*

Magna Cum Laude and Highest Honors, Rutgers University *2024*

Dean's List, Cornell University and Rutgers University *2021 – Present*
